

Cyklop

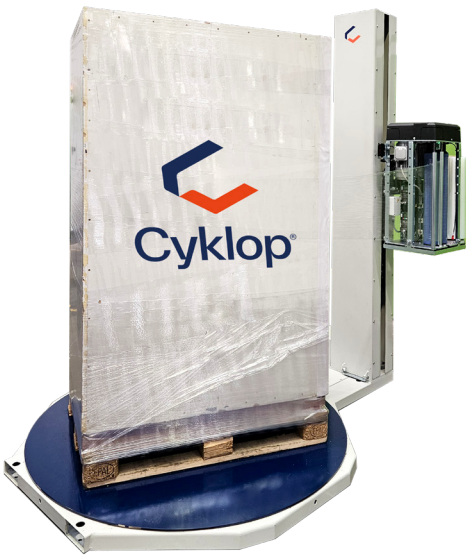

TURNTABLE WRAPPER

The Cyklone is a high performance semi-automatic stretch wrapping machine engineered to efficiently wrap pallets with precision and reliability. Designed for businesses that demand consistent performance, it combines cutting edge technology with simple operation, making it an ideal solution for maximizing efficiency and minimizing costs in the wrapping process. One of the standout features of the Cyklone is its low cost of ownership. The machine is built for minimal maintenance and downtime, ensuring a long lasting performance that reduces operational costs and increases productivity over time.

Equipped with 16 patented conical wheels, the Cyklone guarantees consistent wrapping results every time. With a high performance pre-stretch system, the Cyklone delivers efficiency comparable to automatic machines. The included tablet allows remote management and monitoring of the machine, with an automatic language translation system and access to manuals and spare parts ordering.

The Cyklone offers flexibility with its universal electrical cabinet, simplifies maintenance.

EASY TO USE

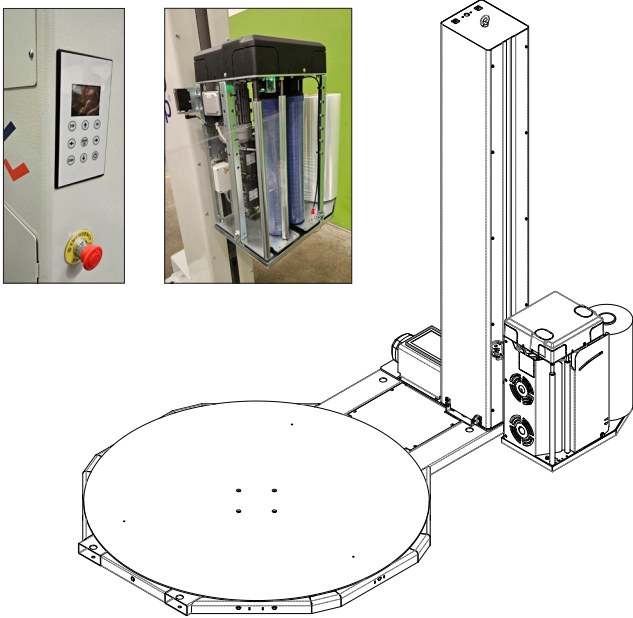

- ✓ Tablet-based control system, always connected to the Internet
- ✓ Film stretch 300%, depending on the stretching system
- ✓ Program settings via tablet

EFFICIENT & SAFE

- ✓ 16 Patented conical wheels
- ✓ Self leveling L-shaped machine base
- ✓ Stability during operation

COST-EFFECTIVE

- ✓ High performance pre-stretch system
- ✓ Minimal maintenance and downtime
- ✓ Ensuring a long lasting performance
- ✓ Saving the time and money

TECHNICAL DATA	
Min. pallet dimensions	600 x 600 (LxW)
Pallet dimensions (LxW)	1000 x 1200 mm (STD)
Min. pallet high	500 mm
Max. pallet high	Pallet height 2.200 mm Optional: max. 3.000 mm
Rotation speed	Up to 12 RPM
Power supply	240V, 50Hz, 2PH+N+T
Electrical power	1,5 KW
Protection	IP 54
Film thickness	12-25 μ
Film stretch	Up to 300 %
